

VincentCare is supporting queer folk who are homeless or experiencing disadvantage to get vaccinated. We can help with booking an appointment, providing information, or referring people to a specialised service.

We will be providing a \$50 Coles gift card to clients that can be used to support clients to receive their vaccine.

This assistance is open to any VincentCare or community services organisation who are supporting a client who identifies with the LGBTIQ+ community. There are a limited number and we'll be giving them out on a first come, first served, basis.

How to Apply

If you are providing support to an LGBTIQ client and would like to access the LGBTIQ Vaccine Incentive Program, please send an email to the contact in your region (see 'Locations Covered') with the following information:

- Name of the client
- Name of referring worker, agency and contact details
- Advise whether the card will be picked up at a VincentCare office or if the card needs to be posted out (remembering to include the relevant postal address)

We will process the application and get back to you asap. You'll need to let us know whether the card can be picked up at a VincentCare office, or if you need us to mail it to you.

If you do need it mailed, please provide a full postal address.

Locations Covered

To request a gift card, please contact the following staff in the area closest to you/your client:
